ChiTurf.com
Lead Test: Pass *see 27 page report at ChiTurf.com
Solar Status: UV resistant
Turf Temp Rating: - 15%
Softness Rating: 2 of 5
Visual Rating: 4 of 5

Intended Use: Dog / Pet applications, Heavy Traffic, Drainage intensive, Multi-purpose high wear resistency

"The Ravenswood is our pet grass. It's a very high-density yet drainage friendly and wear resistant turf product. In our lineup Ravenswood has the strongest backing and has the most drain holes per sq/ft of any of our turf options. It is manufactured to our exact spec to be what we feel is the absolute best all around pet turf grass product on the market currently. Put simply, it's awesome stuff, multi-use and cross compatible. It's great for projects with heavy dog use, high traffic entertainment or sports use as well as commercial space environments with any kind of heavy activity. Truly built to last."
